- Youth-centre teacher in various music and art projects. (Switzerland, 2004 – 2005).

HELLO! MY NAME IS

SET HALLSTRÖM

I am a 1980 born half-Swiss, half-Swedish happy human. I spent my formative years in Sweden but moved to Switzerland when I was 7 years old. At 25 i obtained my Master Degree in Graphic Design from École Cantonale d'Art du Vallais (Swiss Art-school) and moved to Spain to work as a free-lance graphic designer and music producer in the thriving scene of Electronic music of Barcelona. These moves helped me to develop my interest for different languages, and today I speak five fluently. I have a broad and genuine interest for people and this, combined with my well-developed communication skills, gives me the perfect tools to work with in social environments. I am reliable and upfront. One of my most appreciated skills is my attention to detail and my ability to remain clear and calm in very stressful or difficult situations while communicating with customers.

Self-thought computer-geek raised by a Computer Engineer mother, I've been in contact with Internet since 1996. In 2005 I became the administrator of a GNU/Linux Server dedicated to Free-culture promotion provided to me by Alsenet.com located in the data-center of IP-Max in Switzerland. This experience has given me a solid base in the realm of headless *nix systems, tools like Apache, MySQL, PHP, Lighttpd, but also streaming technologies such as Icecast2 and liquidsoap. My experiences as free-lance graphic designer have given me deep knowledge of printed media but also several CMSs like Drupal, Wordpress and Jekyll, HTML and CSS. Free Libre Open Source Software and DIY advocate, I am also volunteering as Project-Leader for the official multimedia-distribution of the Operating System "Ubuntu" (ubuntustudio.org) and I am the initiator of the non-profit digital record-label and artist-management foundation Basspistol.com. When I am not working, I spend most of my time writing music, poetry, animating 3D graphics or experimenting with my GNU/Linux boxes.

TL;DR

- 37 years young. ✓
- Graphic designer and music producer. ✓
- Master Degree from Switzerland. ✓
- Speaks 5 Languages. ✓
- Freelanced for over ten years. ✓
- Currently the Project Lead for the Ubuntu Flavour "Ubuntu Studio". (Volunteer) ✓
- Knows all OS and the coolest programs for Audio, Video, Graphics and Web (server and client). ✓
- GNU/Linux all day everyday. ✓
- Cold nerves and happy attitude. ✓
- Gets happy from poetry and 3D graphics. ✓

Upon request, I can provide references from past Design-clients as well the Swiss ISP Alsenet.com regarding my computer knowledge base.
